

Help Desk Service Level Agreement

Ardent ISD Technology Services | 2026-27

Purpose

This SLA establishes shared expectations for technology support. It defines priority levels, target response times, escalation practices, and the measures used to evaluate service quality.

Service Hours

Standard staffed service hours are **7:00 a.m.-5:00 p.m. on district business days**. Critical incidents affecting districtwide operations may be escalated outside standard hours through designated leadership channels.

Priority Definitions

Priority	Example Conditions	Target First Response	Target Communication
P1 - Critical	Districtwide internet outage; SIS unavailable during critical operations; major VoIP outage; widespread authentication failure	15 minutes	Initial notice within 30 minutes; updates at least hourly while active
P2 - High	Campuswide outage; major instructional platform unavailable to many users; significant testing impact	1 business hour	Update every 2 business hours or when status materially changes
P3 - Standard	Individual device failure; classroom display issue; account problem with workaround available	8 business hours	Status update when assigned, changed, or resolved
P4 - Request	New equipment setup; access request; routine change; consultation	2 business days	Expected completion date communicated after review

Service Expectations

- Tickets should include location, user, device/system, impact, and enough information to reproduce or understand the issue.
- Priority is based on **impact and urgency**, not job title.
- Tickets may be reclassified when scope or business impact changes.
- Security incidents follow the district's incident response process rather than routine help desk workflow.

Escalation

1. Technician owns initial triage.
2. Team lead coordinates unresolved or cross-system issues.
3. Manager escalates P1/P2 issues, vendor dependencies, or repeat failures.
4. CTO is notified for districtwide operational impact, executive communication needs, or decisions involving significant risk/cost.

Service Metrics

- first-response time by priority;
- resolution time by category;
- percentage meeting SLA target;
- backlog age;
- reopened tickets;
- repeat incidents;
- customer satisfaction;
- seasonal ticket volume.

Review Cycle

Technology Services will review SLA performance quarterly and recommend changes based on evidence. Targets should not be lowered simply to make performance percentages appear stronger.

Reference Points

- [CoSN IT Management Resources](#) - K-12 technology operations and leadership resources.
- [USAC E-Rate Program](#) - Federal E-Rate program information for schools and libraries.
- [SETDA Infrastructure for the Future](#) - Guidance for future-ready broadband and infrastructure planning.
- [Future Ready Schools Frameworks](#) - Systems-oriented planning connecting infrastructure, learning, leadership, budget, and equity.

Leadership use: This document is designed to support district-level review, discussion, and decision-making. Technical validation, procurement review, legal review, or compliance review should be completed by the appropriate district specialists when applicable.
