

Enterprise Platform Evaluation Rubric

Ardent ISD | Leadership Review Template

Use

This rubric supports structured evaluation of districtwide platforms such as MDM, LMS, SSO, content management, curriculum management, and related enterprise services. It should complement - not replace - technical testing, privacy/security review, procurement review, accessibility review, and stakeholder input.

Scoring Scale

1 = Poor fit | 2 = Major concerns | 3 = Meets minimum | 4 = Strong | 5 = Excellent

Category	Weight	Questions to Ask
Strategic and instructional fit	15%	Does the platform solve a documented problem? Does it align with district priorities and existing workflows?
User experience	10%	Can students, teachers, staff, and administrators use it consistently with reasonable support?
Interoperability	15%	Does it integrate with identity, SIS, rostering, data, devices, and other required systems?
Privacy and security	15%	What data is collected, shared, retained, protected, and deleted? What district review is required?
Accessibility and equity	10%	Can all intended users access and use it, including users with accessibility or language needs?
Administration and support	10%	What staffing, permissions, monitoring, training, and troubleshooting burden does it create?
Implementation and change readiness	10%	What migration, training, communications, and adoption work is required?
Lifecycle / total cost	10%	What are the recurring licenses, add-ons, implementation, support, and exit costs?
Vendor viability and support	5%	What service commitments, escalation paths, documentation, and continuity protections exist?

Decision Summary Template

Element	Response
Problem being solved	
Recommended platform	
Alternatives considered	
Highest-scoring strengths	

Element	Response
Material risks / gaps	
Implementation prerequisites	
Total cost assumptions	
Decision owner / approving body	
Success measures after 6 and 12 months	

Generative AI Use

A generative AI assistant may help draft comparison questions, summarize sanitized public vendor information, or prototype a scoring table. Do not enter student data, staff data, credentials, sensitive configurations, or vendor-confidential information into public AI tools. Human review is required.
