

Change Adoption KPI Scorecard

Measure Whether the Change Actually Stuck

Change Adoption KPI Scorecard

Initiative: Staff MFA and Identity Security Rollout

District: Ardent ISD

Reporting period: August 2026

Purpose: Distinguish technical deployment from individual adoption.

GenAI data guardrail: Use fictional, public, aggregated, or properly sanitized information with public generative AI tools. Do not enter student records, staff records, personally identifiable information, credentials, sensitive cybersecurity details, legal records, confidential procurement material, vendor-confidential information, or sensitive district project information unless your district has explicitly approved the tool and data use.

ADKAR-Aligned Measures

ADKAR Stage	KPI	Current	Target	Status	What It Tells Us
Awareness	Staff who can explain why MFA is required	94%	95%	WATCH	Communication is nearly complete
Desire	Staff reporting confidence that change is worth the effort	82%	85%	WATCH	Some resistance remains
Knowledge	Required MFA learning completed	97%	98%	WATCH	Training is nearly complete
Ability	Eligible staff successfully complete MFA sign-in without help	92%	95%	WATCH	Small usability/support gap remains

ADKAR Stage	KPI	Current	Target	Status	What It Tells Us
Reinforcement	Staff still using required MFA method without exception after 60 days	95%	95%	ON TRACK	New behavior is becoming routine

Supporting Measures

KPI	Current	Target	Direction	Interpretation
MFA enrollment	96%	98%	Higher	Technical activation is ahead of proficiency
Support contacts per 100 staff	7.4	<= 5 after stabilization	Lower	Demand remains above steady-state expectation
Unresolved exceptions	18	<= 10	Lower	Needs owner-by-owner resolution
Campus champion coverage	100%	100%	Higher	Every campus has local support
User satisfaction with support	4.4 / 5	>= 4.2 / 5	Higher	Support experience is strong

What the Scorecard Prevents

A rollout can appear complete because 96% of accounts are enrolled. That does **not** prove that staff understand the change, can complete the workflow independently, or will sustain the behavior. Adoption measures reveal the human side of implementation.

Intervention Map

If This Is Weak...	Do More Of...	Do Not Assume...
Awareness	Explain risk, purpose, and timing	More training will solve it
Desire	Address burden, concerns, local impact, trust	People are simply being difficult
Knowledge	Training, job aids, demonstrations	Communication alone is enough

If This Is Weak...	Do More Of...	Do Not Assume...
Ability	Practice, coaching, help desk support, accessibility fixes	Completion equals proficiency
Reinforcement	Recognition, reminders, manager expectations, cleanup of exceptions	One successful login means the change is sustained

GenAI Prompt: Diagnose Adoption Barriers

Analyze this sanitized K-12 change-adoption scorecard using ADKAR.

[PASTE SCORECARD]

For each ADKAR stage:

- state whether evidence suggests it is strong, uncertain, or weak;
- identify what additional evidence would help;
- recommend one appropriate intervention;
- identify one intervention that would likely miss the actual barrier.

Do not label people as resistant without evidence.

Do not invent local facts.
