

# Change Readiness and ADKAR Assessment

Staff MFA and Identity Security Rollout

## Change Readiness Assessment: Staff MFA Rollout

**Framework:** ADKAR - Awareness, Desire, Knowledge, Ability, Reinforcement

**Purpose:** Diagnose where adoption is likely to break down and match support to the actual barrier.

### Rating Scale

- **3 - Ready:** Evidence suggests the group can move forward.
- **2 - Watch:** Some gaps exist; targeted support is needed.
- **1 - At risk:** Significant barrier could prevent adoption.

### Group Assessment

| Stakeholder Group    | Awareness | Desire | Knowledge | Ability | Reinforcement | Primary Barrier                       | Planned Response                                        |
|----------------------|-----------|--------|-----------|---------|---------------|---------------------------------------|---------------------------------------------------------|
| Central office pilot | 3         | 3      | 2         | 3       | 2             | Needs clearer recovery guidance       | Pilot FAQ; post-pilot tips                              |
| Teachers             | 3         | 2      | 2         | 2       | 2             | Workflow concern and limited practice | Short demos; campus enrollment sessions; clear deadline |

| Stakeholder Group            | Awareness | Desire | Knowledge | Ability | Reinforcement | Primary Barrier                      | Planned Response                                   |
|------------------------------|-----------|--------|-----------|---------|---------------|--------------------------------------|----------------------------------------------------|
| Paraprofessional / auxiliary | 2         | 2      | 1         | 2       | 1             | Schedule and access to setup support | Supervisor briefings; in person enrollment windows |
| Principals                   | 3         | 3      | 2         | 3       | 3             | Needs campus progress visibility     | Principal dashboard and escalation protocol        |
| Help Desk                    | 3         | 3      | 2         | 2       | 2             | Recovery / exception consistency     | Scripts, role play, daily issue review             |
| Systems Team                 | 3         | 3      | 3         | 3       | 3             | Legacy application edge cases        | Compatibility testing and exception register       |

## ADKAR Diagnostic Notes

### Awareness - Do people understand why the change is necessary?

**Evidence:** Staff survey shows 86% understand that account compromise is a district risk, but only 62% can explain why a password alone is insufficient.

**Action:** Keep the explanation short and concrete: MFA reduces the value of a stolen password. Avoid turning staff communication into a cybersecurity lecture.

### Desire - Do people see enough value to participate?

**Evidence:** Teacher focus group concerns center on inconvenience and personal-phone expectations rather than disagreement with security goals.

**Action:** Explain alternate-factor options, show the actual login experience, and use campus leaders to reinforce that enrollment is an operational expectation with support available.

## Knowledge - Do people know what to do?

**Evidence:** Pilot users complete enrollment successfully when they follow the quick guide, but recovery questions are common.

**Action:** Add a 90-second enrollment video, one-page guide, FAQ, and help desk recovery script.

## Ability - Can people perform the new behavior in real conditions?

**Evidence:** Some auxiliary employees do not routinely use a district computer during their workday.

**Action:** Offer scheduled enrollment stations during shifts and an approved alternate factor.

## Reinforcement - What will keep the change working after launch?

**Evidence:** Without routine follow-up, unenrolled new hires and dormant exceptions could recreate the original risk.

**Action:** Integrate MFA enrollment into onboarding, review exceptions monthly, and include MFA status in identity-security reporting.

## Readiness Actions Before Enforcement

| Action                                   | ADKAR Stage            | Owner          | Due     | Success Evidence                              |
|------------------------------------------|------------------------|----------------|---------|-----------------------------------------------|
| Publish plain-language "why MFA" message | Awareness              | Comms          | Nov 2   | >=80% message open / portal view target       |
| Brief principals on campus role          | Desire / Reinforcement | CTO            | Nov 6   | All principals receive dashboard access       |
| Release video + quick guide              | Knowledge              | Instr. Tech    | Nov 9   | Resources published and tested                |
| Offer enrollment stations                | Ability                | Help Desk / HR | Dec-Jan | 95% of target groups enrolled before deadline |
| Add MFA to new-hire checklist            | Reinforcement          | HR + Systems   | Jan 15  | Onboarding workflow updated                   |
