

Adoption, Training, and Support Plan

Staff MFA and Identity Security Rollout

Adoption, Training, and Support Plan: Staff MFA Rollout

Purpose: Ensure technical deployment produces confident, sustained use rather than one-time enrollment.

Required User Behaviors

By enforcement, staff should be able to:

1. Complete MFA enrollment using an approved factor.
2. Successfully sign in from a normal work device.
3. Recognize and respond to an MFA prompt they did not initiate.
4. Use the documented recovery process when a factor is unavailable.
5. Know where to request an alternate authentication method.

Audience Support Plan

Audience	Training Need	Delivery	Timing	Support Owner	Adoption Evidence
Teachers	Enroll, sign in, recover access	90-sec video + quick guide + campus office hours	4-1 weeks before deadline	Instr. Tech	Enrollment + survey
Principals	Local reinforcement and escalation	15-min leadership briefing	6 weeks before	CTO	Campus completion dashboard use

Audience	Training Need	Delivery	Timing	Support Owner	Adoption Evidence
Auxiliary staff	Hands-on setup, alternate factor	In-person enrollment station	During work shifts	Help Desk + HR	Completion by work group
Central office	Pilot and feedback	Live pilot session + FAQ	6 weeks before districtwide	Systems + Help Desk	Pilot metrics and feedback
Help Desk	Recovery, verification, exceptions	Scenario-based practice	Before pilot and enforcement	Help Desk Mgr.	QA review and ticket outcomes
Systems Team	Monitoring and exception handling	Technical runbook review	Before each cutover	Infrastructure Mgr.	Exception register accuracy

Campus Champion Expectations

Campus champions are not expected to troubleshoot account-security problems. Their role is to:

- Remind staff of deadlines.
- Direct staff to approved instructions and support.
- Surface common barriers to the project team.
- Share campus progress with the principal.
- Reinforce that alternate-factor needs can be handled through the documented process.

Support Model During Enforcement Week

Support Layer	Responsibility
Self-service	Quick guide, video, FAQ, known-issues page
Tier 1	Enrollment help, standard recovery, device-factor questions
Tier 2	Complex identity issues, legacy app conflicts, exception review
Leadership escalation	Widespread campus disruption, policy / HR issue, enforcement decision

Accessibility and Access Considerations

- Provide instructions in accessible digital formats.
- Ensure videos include captions.
- Offer a non-smartphone authentication option.
- Provide in-person assistance for staff who do not routinely work at a computer.
- Avoid requiring staff to disclose personal-device circumstances to supervisors; route requests through the approved support process.

Reinforcement Plan

30 days after enforcement:

- Review adoption by employee type and campus.
- Review support-ticket themes.
- Close or revalidate temporary exceptions.
- Add MFA to new-hire onboarding.
- Update quick guides based on common user errors.
- Share one short "MFA after launch" reminder focused on unexpected prompts and recovery.

Adoption KPIs

KPI	Target
Voluntary enrollment before enforcement	$\geq 98\%$
Staff successfully completing first post-enforcement login	$\geq 97\%$ without Tier 2 support
Approved alternate-factor requests fulfilled by deadline	100%
Staff rating instructions clear / very clear	$\geq 80\%$
MFA-related tickets after 4 weeks	$< 5\%$ of weekly help desk volume
